

Meperia is a cost management and revenue enhancement solutions provider focused on the healthcare supply chain. Our solutions are centered on two primary components: *Data transformation and proprietary software.*

Meperia Strategic Sourcing (MSS)

A complete content solution

Controls item master content:

- Virtual item master w/pictures
- Supply chain + clinical data attributes
- Formulary driven
- Functional equivalents
- EHR/ERP Integration
- Contract exception management w/nightly GPO updates
- Recall Information w/nightly FDA updates
- Market intelligence
- Contract outsourcing
- Guided requisitioning for acute and non-acute sites

Meperia Implant Management Solution (MIMS)

Automates “bill only” processes

Vendors & hospital personnel manage and document implant usage in surgical cases:

- Scan/capture item details (lot, expiration, serial)
- Contract pricing controls invoice discrepancies
- Construct Pricing
- FDA recalled items identified prior to implantation
- Simplifies construct management processes
- EHR/ERP Integration
- Case reporting for billing & revenue management
